Abstract

Our team has been in the crypto world for a longtime. We've seen trends come and go. We've seen meme coins rise and fall. We have seen it all. We are not here to change the game, we know we won't do something revolutionary. Our goal is straightforward: create a meme cryptocurrency paired to a fictitious country which could become real in the metaverse. When we saw the buzz around the Listenbourg, the idea clicked. We would change the world by creating a token that makes people happy and fulfills lifelong dreams, while having fun. The idea is simple: a token that gives others the same happiness we experience in living the Listenbourg dream. Thus, \$LISTENBOURG was born.

We are a Binance Smart Chain token, with a unique 5% transaction tax that is used to : 1% for liquidity and 4 % for wallet marketing. In this whitepaper, you will find more information on the specifics of our token. We hope it answers all your questions. However, should you leave with any lingering questions, please feel free to join our Telegram group and we will try our hardest to answer them.

Listenbourg Coin Dev Team

Roadmap

Winter

Launch Includes liquidity lock + PancakeSwap listing (completed), CoinGecko listing (coming soon), Audit (when a Listenbourgeois Audit will be found), influencer marketing campaigns, and donations to our president of Listenbourg non profit cause.

Spring

Grow Coin Market Cap, exchange listing, merch, and assist Listenbourg company in accepting a full crypto payment in \$LISTENBOURG.

Fall Implement

More exchanges, more influencer marketing, finalize use cases and gain worldwide exposure.

Token Ecosystem

Binance Smart Chain

The Binance Smart Chain (BSC) is a blockchain network that runs in parallel to the Binance Chain. In contrast to the Binance Chain, BSC features smart contract functionality and compatibility with the Ethereum Virtual Machine (EVM). The Binance Smart Chain offers our community the added interoperability of facilitating their investments through Ethereum-based wallets, such as MetaMask. An added advantage of issuing \$LISTENBOURG tokens on the BSC is that it offers our community an affordable blockchain experience through smaller transaction fees compared to the Ethereum Network.

PancakeSwap

PancakeSwap is a Binance Smart Chain Decentralized Exchange (DEX) for swapping BEP-20 tokens. To enable Listenbourg Coin's buying and selling, PancakeSwap offers our community the ability to exchange their BNB for \$LISTENBOURG.

\$LISTENBOURG

Listenbourg Coin (\$LTBG) is a BEP20 token issued on the Binance Smart Chain with a total supply of 10 Millions tokens.

Core Values

Be a good citizen.

We are positive and kind above all else. Our main goal is to create happiness in other lives.

Be charitable.

We strive to be as giving as we can possibly be, helping out our community as much as we can.

Be sustainable. We make decisions that are based on our long term health, not the short term gain.

Be transparent. We strive to be open and honest with our community at all times, for the benefit of all involved.

Be useful

We want to be the digital currency of our country and provide knowledge to people on Web3, blockchain and cryptocurrency.

Potential Use Cases

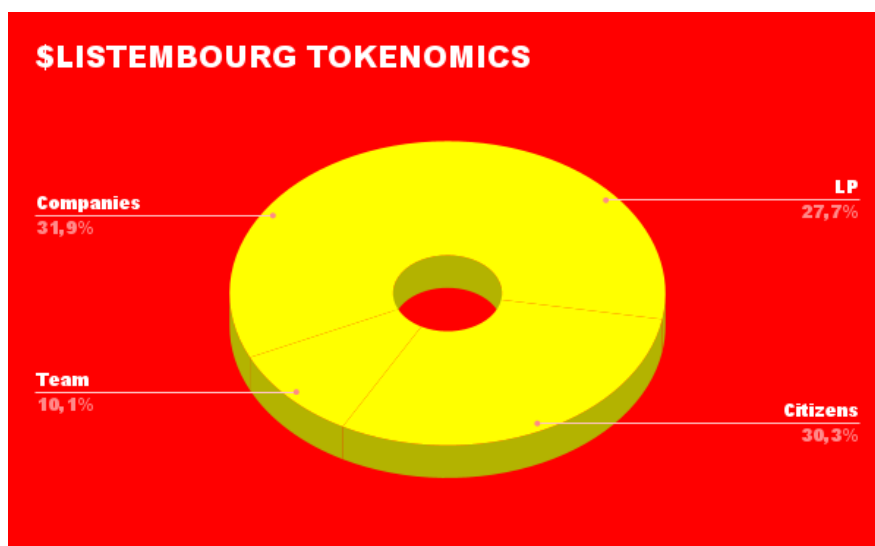

1st cryptocurrency and marketplace of the Listenbourg

We want to give the opportunity to everyone in Listenbourg, and also the rest of the world, to make some business and tourism in Listenbourg.

Creation of listenbourg app

Our end goal would be to facilitate a worldwide marketplace for dealerships to list their inventory for payment with all major cryptocurrencies. In our market research, over 95% of high-end dealerships wish to accept payment in crypto but don't have the knowledge or tools to do so, we will fix this for every company in Listenbourg.

Tokenomics

Tax

The tax aspect of Listenbourg Coin is backed by the imposed 5% tax for all transactions. One percent of this tax is going to the liquidity, 4% in the wallet marketing. There is no plan for the moment for holders who support \$LISTENBOURG but to make it a sustainable movement, something will be done in the future.

The 1% is transferred back as liquidity provider tokens to the PancakeSwap Liquidity Pool (LP). On a weekly basis, a part of the newly accumulated LP tokens will be removed from the liquidity pool and will be appropriated as proceeds to charitable giving.

For full transparency you can follow the creator of the project wallet at the following address: [0xd2325c72319910f749c603b1c597394a4c73dca0](https://bscscan.com/address/0xd2325c72319910f749c603b1c597394a4c73dca0)

Tax will, in first step, serve to :

- Community Airdrops/Giveaways
 - New exchanges liquidity
 - Charitable giving

Audit

Our contract has been verified on BSCscan.

Marketing Plan

Influencers

We are actively reaching out to (and funding when needed) partnerships with influencers in the Listenbourg, charity, and web3 communities to share informational posts about Listenbourg Coin, announcements of giveaways, and memes/funny content to peak interest in the project.

Giveaways + Charity

Our concept is inherently attention-grabbing. We will partner to create social posts with the charities we donate to, to let everyone know the good deeds of our community.

Social Media

\$LISTENBOURG is dedicated to having impeccable content on social media, including hype videos, memes, and other shareable content. We have a network of professional creators that are assisting us in fulfilling this mission.

+Many more surprises along the way
